**CURRICULUM:** Campers will be introduced to basic ranch operations and safety skills while working with our animals, on site. There will also be scheduled classroom time to help our ranchers cope with the summer heat while enjoying other summer fun activities. Each day is planned-out to keep everyone busy and learning new ranch skills. They will be working closely with all types of farm animals, including horses. We will be incorporating a wide range of animal care and proper handling techniques so the campers can walk away feeling accomplished. Our promise to the parents is to put education and safety first at our camp while allowing the campers to grow as individuals and experience life on a ranch.

\*A more structured itinerary will be available closer to starting date and upon payment.
